Welcome, Commander

Warfront: Dominion — a real-time strategy war game by Achraf Benhachem

Warfront: Dominion is a real-time strategy (RTS) war game designed for phones and tablets in landscape, and it runs completely offline. Build bases, run a three-resource economy, research technology, then command armies of infantry, tanks, artillery, aircraft and ships against an AI that thinks and adapts.

Aegis (blue) and Iron Dominion (red) forces clash

What's new in version 2.0

- Completely new graphics: real lighting and shadows, per-faction camouflage and animated tracks.
- Natural terrain with smooth rivers, shoreline foam, real bridges and dense forests.
- Explosion effects that light the ground, with sparks, smoke and shockwaves.
- A professional military interface with drawn icons, unit portraits and new fonts.

Requirements & installation

1. An Android 7.0+ device with an up-to-date Android System WebView.
2. Copy **WarfrontDominion.apk** to the phone and open it.
3. When asked, allow "Install unknown apps" for your file manager or browser.
4. Launch the game: it runs in landscape and needs no account or internet.

> **Tip:** new to strategy games? Start with the campaign — the first mission, "Beachhead", teaches building and economy step by step.

Quick Start

Your first five minutes in any battle

1. **Build a power plant:** tap the BUILD button on the left, choose Power Plant, tap the map to place it, then press ✓. The nearest construction rig drives there automatically.
2. **Secure oil:** build an Oil Extractor on the nearest oil field (dark glossy patches). The blueprint snaps to the field.
3. **Metal:** build an Ore Mine on ore deposits (orange and silver rocks).
4. **Army:** build Barracks for infantry, then a Vehicle Factory for tanks. Tap a factory to open its production list: tap = one unit, long-press = 5 units.
5. **Rally point:** with the factory selected, tap the ground to set where new units gather.
6. **Scout:** send the Pathfinder Scout to find the enemy base and resource sites.
7. **Expand and defend:** every extra extractor raises income, and turrets at chokepoints multiply your strength.
8. **Attack:** select your army with a long-press drag, then use ATK-MOVE toward the enemy.

The build menu: cost on top of each card; locked buildings show why they are locked

> **Goal:** in standard victory you win when every enemy has lost its HQ, vehicle factories and all construction rigs.

Battle Interface

Every element on the screen

1. Menu and pause (save, load, settings).
2. Credits and income per second.
3. Metal and its income rate.
4. Power: produced / used (flashes red on deficit).
5. Clock, game speed (0.5x to 2x) and pause.
6. Quick tools: box select, build, whole army, idle construction rig.
7. Control groups 1-5: long-press to assign, tap to recall, double-tap to jump.
8. Minimap: tap to move the camera. Pulsing red dots are radar blips.
9. Selection panel: portrait, health and info.
10. Command buttons for the current selection.
11. Battle alerts: tap to jump the camera there. (Build and production drawer opens on the right.)

> **Alerts:** when your base or forces are attacked off-screen a red message appears; tap it to jump the camera to the attack instantly.

Controls

Touch, mouse and keyboard

Touch gesture	Action
Tap a unit	Select it (double-tap = all units of that type on screen)
Tap the ground	Move selected units there
Tap an enemy	Direct attack order
Tap a damaged building (with a rig selected)	Repair / finish construction
Tap a transport (with infantry selected)	Board the transport
One-finger drag	Pan the camera (with inertia)
Two-finger pinch	Zoom; two-finger drag also pans
Long-press then drag	Box select (or enable the ☐ button for direct box select)
Two-finger tap	Deselect
Long-press a group button	Assign the current selection to that group
Long-press a unit in a production list	Queue 5 units
Android back button	Cancel the current order or open the pause menu

Mouse / key	Action
Left click / drag	Select / box select
Right click	Smart order (move / attack / load)
Wheel	Zoom
Arrows or screen edge	Pan the camera
Ctrl+1…5 / 1…5	Assign / recall groups
A S H P R F	Attack-move, stop, hold, patrol, retreat, formation
B Space Esc Delete	Build, jump to HQ, pause, demolish building

Economy & Power

Three resources drive the war machine

Credits

The core resource for everything. Comes from oil extractors (+8/s each) and the HQ (+5/s).

Metal

Needed for heavy vehicles, aircraft and research. Comes from ore mines (+2.6/s each) and the HQ (+1/s).

Power

Not a stockpile but a grid: each plant gives +50 and every building draws some. Watch the meter in the top bar.

What happens on low power?

- Production and research slow in proportion to available power (down to a minimum of 35% speed).
- Extractor and mine output drops.
- Defensive turrets fire more slowly.
- Radar switches off and a lightning icon appears over affected buildings.

Economy rules

- Costs are paid up front, fully refunded when production is cancelled, and 75% refunded when a construction is cancelled before it starts.
- Demolishing returns 40% of the building's value, scaled by its condition.
- Resources can never go negative.
- Extractors and mines can only be built on their sites; those sites are reserved for them.
- The Deep Extraction research raises all extractor and mine income by 25%.

Golden rule: keep power at least 15 above consumption, and build a new extractor roughly every two minutes early in a match.

Buildings

Every structure, its role and requirements

	Building	Cost ¢/m	Power	HP	Requires
	**Command HQ** Command HQ: produces construction rigs and gives base income. Losing it is very dangerous.	—	+20	4600	–
	**Power Plant** Power plant: +50 power. Low power slows everything down.	260	+50	1035	–
	**Oil Extractor** Oil extractor: built on an oil field (dark glossy patches) and produces Credits.	300	-5	920	–
	**Ore Mine** Ore mine: built on ore deposits (crystal rocks) and produces Metal.	260 / 40	-5	1035	–
	**Barracks** Barracks: trains infantry.	350	-10	1380	–
	**Vehicle Factory** Vehicle factory: tanks, artillery and support vehicles.	700 / 150	-20	2300	Power Plant
	**Airfield** Airfield: aircraft and helicopters; rearms jets.	800 / 200	-25	2070	Research Lab
	**Shipyard** Shipyard: must touch water. Builds naval units.	650 / 150	-20	2070	Vehicle Factory
	**Research Lab** Research lab: develops technologies and upgrades.	600 / 150	-20	1265	Vehicle Factory

	Building	Cost ¢/m	Power	HP	Requires
	**Repair Station** Repair station: quickly repairs nearby units.	400 / 80	-10	1150	Vehicle Factory
	**Radar Array** Radar array: shows enemy movement as red blips and detects nearby cloaked units.	450 / 60	-15	1035	Power Plant
	**Sentinel MG Nest** MG nest: anti-infantry defense with light anti-air.	200 / 20	-3	1035	Barracks
	**Rampart Cannon** Defensive anti-armor cannon.	400 / 100	-6	1725	Vehicle Factory
	**Aegis SAM Site** Long-range surface-to-air missile site.	380 / 80	-6	1150	Radar Array
	**Fortified Wall** Cheap fortified wall that blocks paths.	40 / 10	0	1610	–
	**Strategic Missile Silo** Strategic missile silo: superweapon launching a devastating strike every 4 minutes.	3000 / 1200	-40	2875	Research Lab, Experimental Program

Construction rules

- Buildings must be inside your base area (near existing buildings), except extractors and mines.
- No building on water, rocks, forests or bridges, or on top of enemy units.
- The game blocks any building that would seal off every path out of your base.
- Several rigs on the same building finish it faster.
- Idle construction rigs automatically repair nearby damaged buildings.
- Walls: after placing a wall you stay in build mode to place the next one quickly.

Combat System

Armor, damage types, range and line of sight

Every weapon has a damage type and every target has an armor class. Final damage = weapon damage × the multiplier in this table. Match the right unit to the right target!

Damage type	Infantry	Light	Heavy	Air	Building	Naval
Bullet	×1.00	×0.55	×0.15	×0.45	×0.12	×0.25
Armor-piercing	×0.35	×1.00	×1.25	×0.00	×0.70	×1.00
High explosive	×1.30	×0.80	×0.45	×0.00	×1.20	×0.70
Flak	×0.50	×0.25	×0.10	×1.60	×0.10	×0.15
Missile	×0.55	×1.00	×0.95	×1.25	×0.80	×1.10
Torpedo	×0.00	×0.00	×0.00	×0.00	×0.40	×1.70
Siege	×0.80	×0.90	×0.80	×0.00	×2.20	×0.90
Energy beam	×0.90	×1.00	×1.00	×1.00	×0.90	×1.00

Hits and accuracy

- Direct shots have a hit chance; fast targets and infantry in forests are harder to hit.
- Artillery (rockets and howitzers) fires indirectly with scatter and arcs over obstacles.
- Direct-fire weapons need line of sight, which rocks and cliffs block.
- Splash damage falls off with distance from the blast centre.

Key rules

- Artillery has a minimum range: protect it with tanks.
- Howitzers and siege mortars stop before firing.
- Infantry in forests take 30% less damage.
- Jets fly sorties, then return to the airfield to rearm.
- Units never fire at what your team cannot see (no blind fire into fog).

Weapon triangle: anti-tank infantry beats tanks, tanks beat light vehicles, machine guns and artillery mow down infantry, and anti-air brings down aircraft.

Aegis Coalition

Hold the line. Move as one.

Construction Rig VEHICLE

Construction rig: builds and repairs every structure. Protect it — it is your economy.

HP 320 · SPD 1.6 · ¢ 225 · ⏱ 10s

Rifle Squad INFANTRY

Cheap, fast-to-train infantry squad. Excellent against other infantry and digs in well inside forests.

HP 120 · SPD 1.1 · RNG 4.7 · DPS 10 · DMG BULLET · ¢ 100 · ⏱ 6s

Lancer AT Team INFANTRY

Anti-armor infantry carrying armor-piercing rockets. Deadly to tanks, vulnerable to infantry.

HP 110 · SPD 0.9 · RNG 5.9 · DPS 26 · DMG AP · ¢ 140 · 35m · ⏱ 8s

Pathfinder Scout VEHICLE

Very fast scout car with long sight that detects nearby cloaked units.

HP 170 · SPD 3.4 · RNG 5.0 · DPS 19 · DMG BULLET · ¢ 135 · ⏱ 6s

Viper Light Tank VEHICLE

Fast light tank for raiding extractors and light vehicles.

HP 350 · SPD 2.4 · RNG 5.9 · DPS 24 · DMG AP · ¢ 216 · 72m · ⏱ 10s

Bastion Battle Tank VEHICLE

Main battle tank: balanced armor and firepower, the backbone of any army.

HP 640 · SPD 1.8 · RNG 6.6 · DPS 55 · DMG AP · ¢ 360 · 162m · ⏱ 15s

Juggernaut Heavy Tank VEHICLE

Twin-cannon heavy tank; slow but breaks defensive lines.

HP 1300 · SPD 1.3 · RNG 7.2 · DPS 80 · DMG AP · ¢ 648 · 324m · ⏱ 24s

Skyguard Flak Track VEHICLE

Mobile anti-air vehicle that shreds aircraft and helicopters.

HP 300 · SPD 1.9 · RNG 8.4 · DPS 42 · DMG FLAK · ¢ 234 · 90m · ⏱ 11s

Tempest Rocket Battery VEHICLE

Rocket artillery that saturates large areas with indirect fire.

HP 260 · SPD 1.6 · RNG 12.5 · DPS 21 · DMG HE · ¢ 342 · 135m · ⏱ 15s

Longbow Howitzer VEHICLE

Long-range howitzer; must stop to fire and has a minimum range.

HP 300 · SPD 1.3 · RNG 18.1 · DPS 22 · DMG HE · ¢ 468 · 216m · ⏱ 20s

Quartermaster Supply Truck VEHICLE

Logistics truck that repairs nearby vehicles in the field.

HP 300 · SPD 1.9 · ¢ 216 · 36m · ⏱ 10s

Mako Amphibious Transport VEHICLE

Amphibious transport carrying 6 infantry squads over water and land.

HP 420 · SPD 2.3 · RNG 5.0 · DPS 19 · DMG BULLET · ¢ 270 · 54m · ⏱ 12s

Hawkeye Recon Drone AIR

Recon drone with a very wide view that detects cloaked units.

HP 90 · SPD 4.4 · ¢ 120 · ⏱ 7s

Harrier Attack Helicopter AIR

Rocket attack helicopter; an armor hunter that ignores terrain.

HP 400 · SPD 3.3 · RNG 6.7 · DPS 53 · DMG MISSILE · ¢ 500 · 100m · ⏱ 16s

Falcon Interceptor AIR

Air-superiority interceptor that returns to the airfield to rearm.

HP 300 · SPD 7.5 · RNG 8.4 · DPS 44 · DMG MISSILE · ¢ 450 · 100m · ⏱ 15s

Thunderhead Bomber AIR

Heavy bomber that carpets ground targets, then returns to rearm.

HP 700 · SPD 4.7 · RNG 1.3 · DPS 682 · DMG HE · ¢ 850 · 220m · ⏱ 24s

Corsair Patrol Boat NAVAL

Fast patrol boat for coastal raids, with an anti-air machine gun.

HP 320 · SPD 2.9 · RNG 7.2 · DPS 52 · DMG HE · ¢ 260 · 50m · ⏱ 10s

Warden Destroyer NAVAL

Heavy destroyer with twin guns and missiles; its sonar reveals submarines.

HP 1150 · SPD 1.8 · RNG 10.0 · DPS 94 · DMG HE · ¢ 800 · 240m · ⏱ 26s

Leviathan Submarine NAVAL

Stealth submarine with ship-killing torpedoes.

HP 600 · SPD 1.9 · RNG 8.4 · DPS 54 · DMG TORPEDO · ¢ 650 · 180m · ⏱ 22s

Citadel Mobile Fortress EXPERIMENTAL

Experimental mobile fortress with twin cannons, SAMs and field repair.

HP 4200 · SPD 0.8 · RNG 8.1 · DPS 212 · DMG AP · ¢ 2340 · 810m · ⏱ 60s

Reading a card: HP health · SPD speed (tiles/s) · RNG range in tiles · DPS damage per second · DMG damage type · ¢ cost (credits · metal) · ⏱ build time.

Vortex Directorate

See first. Strike once.

Fabricator Drone Rig VEHICLE

Construction rig: builds and repairs every structure. Protect it — it is your economy.

HP 320 · SPD 1.6 · ¢ 250 · ⏱ 10s

Directorate Operatives INFANTRY

Cheap, fast-to-train infantry squad. Excellent against other infantry and digs in well inside forests.

HP 138 · SPD 1.1 · RNG 4.7 · DPS 10 · DMG BULLET · ¢ 100 · ⏱ 6s

Lancer AT Team INFANTRY

Anti-armor infantry carrying armor-piercing rockets. Deadly to tanks, vulnerable to infantry.

HP 126 · SPD 0.9 · RNG 5.9 · DPS 26 · DMG AP · ¢ 140 · 35m · ⏱ 8s

Ghost Recon Team INFANTRY

Cloaked recon team, invisible unless detected or firing. Ideal for scouting.

HP 103 · SPD 1.4 · RNG 4.7 · DPS 10 · DMG BULLET · ¢ 220 · 40m · ⏱ 10s

Pathfinder Scout VEHICLE

Very fast scout car with long sight that detects nearby cloaked units.

HP 170 · SPD 3.4 · RNG 5.0 · DPS 19 · DMG BULLET · ¢ 150 · ⏱ 6s

Kestrel Strike Tank VEHICLE

Fast light tank for raiding extractors and light vehicles.

HP 350 · SPD 2.4 · RNG 5.9 · DPS 24 · DMG AP · ¢ 240 · 80m · ⏱ 10s

Wraith Hover Tank VEHICLE

Hover tank with a plasma cannon; fast and crosses both water and land.

HP 540 · SPD 2.8 · RNG 6.4 · DPS 42 · DMG BEAM · ¢ 380 · 160m · ⏱ 14s

Skyguard Flak Track VEHICLE

Mobile anti-air vehicle that shreds aircraft and helicopters.

HP 300 · SPD 1.9 · RNG 8.4 · DPS 42 · DMG FLAK · ¢ 260 · 100m · ⏱ 11s

Swarm Missile Rack VEHICLE

Rocket artillery that saturates large areas with indirect fire.

HP 260 · SPD 1.6 · RNG 12.5 · DPS 21 · DMG HE · ¢ 380 · 150m · ⏱ 15s

Spectre EW Rig VEHICLE

Electronic-warfare rig: jams enemy weapons (−35% accuracy) and detects cloaked units.

HP 340 · SPD 1.9 · ¢ 450 · 120m · ⏱ 16s

Mako Amphibious Transport VEHICLE

Amphibious transport carrying 6 infantry squads over water and land.

HP 420 · SPD 2.3 · RNG 5.0 · DPS 19 · DMG BULLET · ¢ 300 · 60m · ⏱ 12s

Hawkeye Recon Drone AIR

Recon drone with a very wide view that detects cloaked units.

HP 90 · SPD 4.4 · ¢ 102 · ⏱ 7s

Harrier Attack Helicopter AIR

Rocket attack helicopter; an armor hunter that ignores terrain.

HP **400** · SPD **3.3** · RNG **6.7** · DPS **53**

DMG **MISSILE** · ¢ **425 · 85m** · ⏱ **16s**

Falcon Interceptor AIR

Air-superiority interceptor that returns to the airfield to rearm.

HP **300** · SPD **7.5** · RNG **8.4** · DPS **44**

DMG **MISSILE** · ¢ **383 · 85m** · ⏱ **15s**

Thunderhead Bomber AIR

Heavy bomber that carpets ground targets, then returns to rearm.

HP **700** · SPD **4.7** · RNG **1.3** · DPS **682**

DMG **HE** · ¢ **723 · 187m** · ⏱ **24s**

Corsair Patrol Boat NAVAL

Fast patrol boat for coastal raids, with an anti-air machine gun.

HP **320** · SPD **2.9** · RNG **7.2** · DPS **52** · DMG **HE**

¢ **260 · 50m** · ⏱ **10s**

Stinger Missile Boat NAVAL

Guided-missile boat against ships, ground and air.

HP **300** · SPD **2.7** · RNG **9.7** · DPS **23**

DMG **MISSILE** · ¢ **380 · 90m** · ⏱ **13s**

Leviathan Submarine NAVAL

Stealth submarine with ship-killing torpedoes.

HP **600** · SPD **1.9** · RNG **8.4** · DPS **54**

DMG **TORPEDO** · ¢ **650 · 180m** · ⏱ **22s**

Aurora Strike Platform EXPERIMENTAL

Experimental hovering strike platform firing energy beams at every target type.

HP **2400** · SPD **2.2** · RNG **7.8** · DPS **122**

DMG **BEAM** · ¢ **2040 · 723m** · ⏱ **55s**

Reading a card: HP health · SPD speed (tiles/s) · RNG range in tiles · DPS damage per second · DMG damage type · ¢ cost (credits · metal) · ⏱ build time.

Iron Dominion

Steel conquers all.

Foundry Crawler VEHICLE

Construction rig: builds and repairs every structure. Protect it — it is your economy.

HP 336 · SPD 1.5 · ¢ 250 · ⏱ 10s

Conscript Battalion INFANTRY

Cheap, fast-to-train infantry squad. Excellent against other infantry and digs in well inside forests.

HP 130 · SPD 1.1 · RNG 4.7 · DPS 10 · DMG BULLET · ¢ 80 · ⏱ 6s

Lancer AT Team INFANTRY

Anti-armor infantry carrying armor-piercing rockets. Deadly to tanks, vulnerable to infantry.

HP 110 · SPD 0.9 · RNG 5.9 · DPS 26 · DMG AP · ¢ 140 · 35m · ⏱ 8s

Warden Armored Car VEHICLE

Very fast scout car with long sight that detects nearby cloaked units.

HP 179 · SPD 3.0 · RNG 5.0 · DPS 19 · DMG BULLET · ¢ 150 · ⏱ 6s

Anvil Battle Tank VEHICLE

Main battle tank: balanced armor and firepower, the backbone of any army.

HP 672 · SPD 1.6 · RNG 6.6 · DPS 55 · DMG AP · ¢ 400 · 180m · ⏱ 15s

Hammer Heavy Tank VEHICLE

Twin-cannon heavy tank; slow but breaks defensive lines.

HP 1365 · SPD 1.1 · RNG 7.2 · DPS 80 · DMG AP · ¢ 720 · 360m · ⏱ 24s

Mammoth Assault Tank VEHICLE

Super-heavy assault tank with an anti-air machine gun. A moving fortress.

HP 1785 · SPD 1.0 · RNG 7.5 · DPS 104 · DMG AP · ¢ 950 · 460m · ⏱ 30s

Breacher Siege Mortar VEHICLE

Heavy siege mortar that wrecks buildings and fortifications.

HP 998 · SPD 0.8 · RNG 11.3 · DPS 53 · DMG SIEGE · ¢ 650 · 340m · ⏱ 24s

Skyguard Flak Track VEHICLE

Mobile anti-air vehicle that shreds aircraft and helicopters.

HP 315 · SPD 1.7 · RNG 8.4 · DPS 42 · DMG FLAK · ¢ 260 · 100m · ⏱ 11s

Tempest Rocket Battery VEHICLE

Rocket artillery that saturates large areas with indirect fire.

HP 273 · SPD 1.5 · RNG 12.5 · DPS 21 · DMG HE · ¢ 380 · 150m · ⏱ 15s

Longbow Howitzer VEHICLE

Long-range howitzer; must stop to fire and has a minimum range.

HP 315 · SPD 1.1 · RNG 18.1 · DPS 22 · DMG HE · ¢ 520 · 240m · ⏱ 20s

Quartermaster Supply Truck VEHICLE

Logistics truck that repairs nearby vehicles in the field.

HP 315 · SPD 1.7 · ¢ 240 · 40m · ⏱ 10s

Mako Amphibious Transport VEHICLE

Amphibious transport carrying 6 infantry squads over water and land.

HP **441** SPD **2.1** RNG **5.0** DPS **19**

DMG **BULLET** ¢ **300 · 60m** ⏱ **12s**

Hawkeye Recon Drone AIR

Recon drone with a very wide view that detects cloaked units.

HP **90** SPD **4.4** ¢ **120** ⏱ **7s**

Harrier Attack Helicopter AIR

Rocket attack helicopter; an armor hunter that ignores terrain.

HP **400** SPD **3.3** RNG **6.7** DPS **53**

DMG **MISSILE** ¢ **500 · 100m** ⏱ **16s**

Thunderhead Bomber AIR

Heavy bomber that carpets ground targets, then returns to rearm.

HP **700** SPD **4.7** RNG **1.3** DPS **682**

DMG **HE** ¢ **850 · 220m** ⏱ **24s**

Corsair Patrol Boat NAVAL

Fast patrol boat for coastal raids, with an anti-air machine gun.

HP **320** SPD **2.9** RNG **7.2** DPS **52** DMG **HE**

¢ **260 · 50m** ⏱ **10s**

Warden Destroyer NAVAL

Heavy destroyer with twin guns and missiles; its sonar reveals submarines.

HP **1150** SPD **1.8** RNG **10.0** DPS **94**

DMG **HE** ¢ **800 · 240m** ⏱ **26s**

Colossus Siege Walker EXPERIMENTAL

Experimental giant siege walker whose cannon crushes buildings.

HP **5880** SPD **0.7** RNG **9.4** DPS **123**

DMG **SIEGE** ¢ **2800 · 1000m** ⏱ **65s**

Reading a card: HP health · SPD speed (tiles/s) · RNG range in tiles · DPS damage per second · DMG damage type · ¢ cost (credits · metal) · ⏱ build time.

Orders & Formations

Precise control of every battalion

	Order	Description
	STOP	Cancel all orders immediately.
	HOLD	Hold position: units fire at anything in range but do not chase.
	ATK-MOVE	Move while engaging any enemy on the way – the ideal attack order.
	PATROL	Patrol back and forth between the current position and a chosen point.
	RETREAT	Fall back to the nearest repair station or HQ (aircraft to the airfield).
	FORMATION	Cycle formations: auto, line, column, wedge, box.
	REGROUP	Gather the selected units into a tight formation.
	QUEUE	Queue mode: new orders are added after the current ones (draw routes).
	UNLOAD	Unload infantry from the amphibious transport at a chosen point.
	RALLY	Rally point for new units leaving a factory.
	LAUNCH	Launch the strategic missile from the silo when fully charged.

Formations

- **Line:** a wide front that brings the most guns to bear at once.
- **Column:** ideal for bridges and narrow passes.
- **Wedge:** a spearhead for breakthroughs with heavy tanks in front.
- **Box:** all-round defense with support and artillery in the middle.

In any formation other than auto, the group moves at the speed of its slowest unit to stay together; heavy tanks always lead while artillery and support trail behind.

Terrain & Intelligence

Information is half the battle

Rivers, bridges, forests and plateaus: every terrain type changes the tactics

Terrain	Effect
Grass, dirt and roads	Normal movement; roads are slightly faster.
Forests	Slow vehicles, hide ground units from distant observers, and protect infantry (–30% damage).
Plateaus	+20% vision and +12% weapon range for units standing on them.
Rocks and cliffs	Impassable, and block direct fire.
Water	Ships, hovercraft and amphibians only. Bridges let ground forces cross.

Fog of war

Unexplored areas are black. Previously explored areas are dimmed and keep faded “ghosts” of the last enemy buildings you saw – they may have been destroyed or changed!

Radar

The Radar Array shows enemy units in its range as pulsing red blips on the map and minimap, and needs enough power to work.

Stealth and detection

Ghost Recon and submarines (and Vortex drones after research) are invisible except within range of detectors – scouts, drones, radar, destroyers and EW rigs – or at the moment they fire.

Electronic warfare

The Spectre EW rig jams enemies inside its aura: –35% accuracy, –15% range, and it hides friendly units from enemy radar.

Research

Technology makes the difference

Research happens in the Research Lab (one project per lab at a time). Build more labs to research in parallel.

Research	Effect	Cost ¢/m	Time	Requires
Deep Extraction	+25% income from extractors and mines.	300 / 50	30s	–
Improved Munitions	+15% damage for all weapons.	350 / 120	35s	–
Composite Armor	+20% HP for vehicles and ships.	400 / 150	40s	–
Advanced Optics	+15% vision and +8% weapon range.	300 / 100	30s	–
Heavy Armor Program	Unlocks heavy tanks and siege vehicles.	500 / 200	45s	–
Ballistic Computers	Unlocks the howitzer; +10% artillery accuracy.	450 / 150	40s	–
Aviation Doctrine	Unlocks fighters and bombers.	450 / 150	40s	–
Experimental Program	Unlocks the faction experimental unit and the missile silo.	1200 / 500	90s	Heavy Armor Program, Improved Munitions
Field Logistics ★	Aegis only: units self-repair out of combat; supply aura doubled.	400 / 100	35s	–
Phase Cloak ★	Vortex only: unlocks Ghost and Spectre EW; drones become cloaked.	450 / 150	40s	–
Reinforced Hulls ★	Iron only: +30% building and turret HP; walls at half price.	400 / 150	35s	–

Suggested order: Deep Extraction first to boost the economy, then your faction research, then Improved Munitions and the Heavy Armor Program, and the experimental program in the late game.

The Three Factions

Three different ways to wage war

Aegis Coalition — Hold the line. Move as one.

A conventional, balanced military coalition. Reliable tanks, artillery and strong defenses.

Strengths: Vehicles 10% cheaper, +15% building HP, and repair stations 50% stronger.

Play style: Build a solid economy and defend with turrets, then advance with a mixed army supported by supply trucks and a repair station near the front.

Experimental unit: Citadel mobile fortress

Vortex Directorate — See first. Strike once.

A high-tech force built on drones, stealth and electronic warfare.

Strengths: +20% vision, +15% infantry HP, aircraft 15% cheaper, and radar 25% longer.

Play style: Know everything before your enemy: scout with drones, strike with fast Wraith hover tanks across water, and jam the enemy with EW rigs.

Experimental unit: Aurora strike platform

Iron Dominion — Steel conquers all.

An industrial heavy war machine: super-heavy armor, siege weapons and fortifications.

Strengths: +5% vehicle HP (10% slower), and +30% turret HP.

Play style: Advance slowly but relentlessly: Mammoth tanks in front, siege mortars behind, and fortify every area you take.

Experimental unit: Colossus siege walker

AI Opponents

A real AI that plays by the same rules

The AI does not cheat: it only sees what its team sees through the fog of war and pays the same costs. It builds and expands its economy, scouts, analyses your army composition to produce counters, defends its base, pulls damaged units back for repair, and weighs your defenses before attacking.

Level	Description
Recruit	Beginner: slow decisions, small late attacks, rarely builds counters.
Veteran	Experienced: good economy, retreats damaged units, adapts to your army.
Commander	Fast reactions, two-pronged flanking attacks and bigger waves.
Warlord	The fastest and fiercest, with a +25% income bonus (can be turned off in Settings).

How to beat it: raid its extractors early with light tanks, defend chokepoints with turrets and watch its movements on radar. The AI avoids attacking heavily fortified bases – use that to build a bigger economy.

Campaign: Operation Iron Dawn

7 missions for the Aegis Coalition

1 **Beachhead**

Establish a forward base — power plant, barracks and an oil extractor — then destroy the enemy outpost.

Map: Ashen Plains · Enemy: Iron Dominion

2 **Hold the Ridge**

Hold for 10 minutes against armored waves pouring through the mountain passes until reinforcements arrive.

Map: Iron Pass · Enemy: Iron Dominion

3 **Lost Patrol**

Find a patrol trapped across the river and bring at least two survivors back to HQ.

Map: Twin Rivers · Enemy: Vortex Directorate

4 **Island Grab**

Capture the three marked zones and hold them for 90 consecutive seconds.

Map: Archipelago Front · Enemy: Vortex Directorate

5 **Silence the Guns**

Destroy the four howitzer batteries shelling your base.

Map: Iron Pass · Enemy: Iron Dominion

6 **The Long Road**

Escort the supply convoy through the crossroads; at least two trucks must arrive.

Map: Highland Crossroads · Enemy: Vortex Directorate

7 **Iron Warlord**

Storm the fortress and destroy the Colossus siege walker and the enemy HQ.

Map: Twin Rivers · Enemy: Iron Dominion

> Each mission unlocks when the previous one is complete, and progress is saved automatically. Campaign difficulty (easy / normal / hard) is chosen on the mission screen.

Skirmish, Sandbox & Maps

Skirmish

- Up to 4 players (you and 3 opponents) depending on the map.
- Free-for-all or teams (T1-T4).
- Starting resources: low, normal, high.
- Victory: standard, HQ destruction, total annihilation.

Sandbox

- Reveal the whole map.
- SPAWN tab: drop any unit for any player.
- +10k resources and instant research unlock.
- Perfect for testing tactics and units.

Twin Rivers

96×96 · 2 players

Two rivers guard each base; controlling the bridges and the central plateau is the key to victory.

Iron Pass

96×80 · 2 players

A mountain wall with three narrow passes. Artillery and fortifications rule this map.

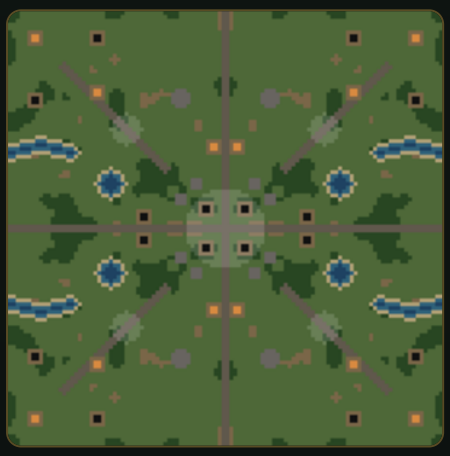

Maps

Archipelago Front

112×96 · 2 players

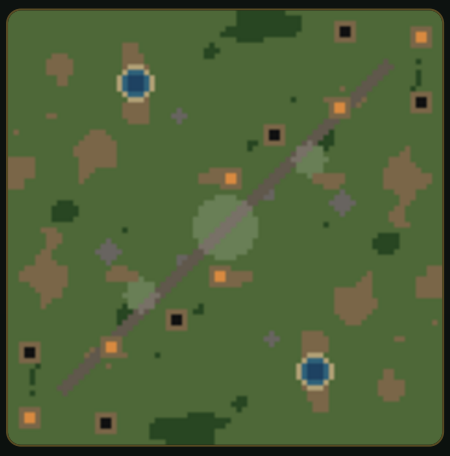

Coastal war across scattered islands and a single land bridge; naval power decides the rest.

Highland Crossroads

112×112 · 4 players

Four armies, one crown: a central plateau where the great roads meet (up to 4 players).

Ashen Plains

80×80 · 2 players

A small open arena of scorched fields: fast, brutal battles.

Tips from Veteran Commanders

Naval and air battles: submarines hunt ships, gunships hunt armor

1. **Economy first:** one extra extractor in minute one is worth two tanks at minute five.
2. **Never idle factories:** always keep two units queued.
3. **Combined arms:** tanks in front, anti-tank infantry behind, artillery at the back, and escorting anti-air.
4. **Use groups:** group 1 for the main army, 2 for artillery, 3 for aircraft.
5. **Attack with ATK-MOVE**, not a plain move, so your units don't drive past the enemy without fighting.
6. **High ground:** put artillery and turrets on plateaus for extra range.
7. **Forest ambushes:** infantry in forests are hidden and protected.
8. **Retreat and repair:** a damaged unit pulled back is cheaper than a new one.
9. **Reveal the cloaked:** always escort your army with a drone or scout.
10. **The superweapon:** the silo draws enemy attention — defend it well and aim it at building clusters.

Settings, Saving & FAQ

Settings

- Master, music and effects volume.
- Camera speed, zoom sensitivity and UI scale.
- Graphics quality (low / medium / high), effects level, screen shake and vibration.
- Unit cap (100-300) for weaker devices.
- FPS counter.

Saving

- 3 manual save slots from the pause menu.
- Autosave every two minutes and when leaving the app, with a “Continue” button on the main menu.
- Saves are integrity-checked; a corrupted save is safely rejected.

FAQ

The game is slow on my device? Choose “Low” quality and reduced effects, and lower the unit cap. The game also lowers its render resolution automatically to stay smooth.

I can’t build here? Read the red message in the status bar: the spot may be too far from your base, on a forest, or it would block all paths.

My units won’t fire? Make sure the target is visible and of a type they can hit (tanks don’t attack aircraft).

Why is everything slow? Usually low power — build a power plant.

Do I need internet? No. The game is fully offline.
